

# Shock Proof! your students

with Western Power's Free in-school safety education program

## Why Shock Proof! your students?

Every year in Western Australia, hundreds of families are affected by the trauma from injury associated with electrical shock.

Most of these injuries are due to a lack of understanding of electrical safety.

Each year World of Energy presenters visit about 200 schools, talking to over 50,000 K - 7 students.

## What you get on the day.

World of Energy presenters spend 25 to 45 minutes with each booked class, "Shock Proofing!" your students. We use role plays, posters, and real-life props to encourage active learning.

- We provide up to three presenters on any one day or spread the visits over a number of days to fit around your school program.
- You do not have to move your children. Our presenters will move from classroom to classroom.
- We provide each class teacher with a support pack reviewing key safety messages, colourful brochures and a letter to parents telling them of Shock Proof!
- Each school library receives a 6-pack of colourful safety posters reinforcing key safety messages.

## How to contact us.

Phone World of Energy on (08) 9430 5655 or e-mail to [safetyeducation@westernpower.com.au](mailto:safetyeducation@westernpower.com.au) with:

- Name and address of your school
- Phone and fax number
- Number of classes by years
- School start, break and end times
- Contact person
- Your e-mail address; and,
- Two or three preferred dates.

We will confirm the booking in writing by email or fax.

### **And remember - the program is free!**

**Note** To make the most of our resources, we ask that you:

- Book as many classes as practicable. We can manage a whole school. This includes kindergarten and pre-primary.

Further questions? Ask for the Safety Education Coordinator when you call.

**Proudly provided by Western Power**
